

Health and safety - Food hygiene

(Including procedure for reporting food poisoning)

Policy statement

In our setting we provide and/or serve food for children on the following basis

- Snacks.
- Cooking/Baking Activities

We maintain the highest possible food hygiene standards with regard to the purchase, storage, preparation and serving of food.

We are registered as a food provider with the local authority Environmental Health Department.

Procedures

- The person in charge and the person responsible for food preparation understands the principles of Hazard Analysis and Critical Control Point (HACCP) as it applies to their business. This is set out in *Safer Food Better Business*. The basis for this is risk assessment as it applies to the purchase, storage, preparation and serving of food to prevent growth of bacteria and food contamination.
- At least one person has an in-date Food Hygiene Certificate but all staff are aware of basic food hygiene standards.
- **Our main food supplier is via Nightingale House.**
- Food is stored at correct temperatures and is checked to ensure it is in-date and not subject to contamination by pests, rodents or mould.
- Fridge temperature is checked every morning by a responsible person.
- The fridge is cleaned out weekly.
- Food preparation areas are cleaned before use as well as after use.
- All open packages to be dated when opened and placed in an airtight container e.g raisins and bread sticks.
- There are separate facilities for hand-washing and for washing up.
- All surfaces are clean and non-porous.
- All utensils, crockery etc are clean and stored appropriately.
- Waste food is disposed of daily.
- Only kitchen cloths are used. These are washed daily in hot water and Milton solution.
- Cleaning materials and other dangerous materials are stored out of children's reach.
- Children do not have unsupervised access to the kitchen.

- When children take part in cooking activities, they:
 - are supervised at all times;
 - understand the importance of hand washing and simple hygiene rules
 - are kept away from hot surfaces and hot water; and
 - do not have unsupervised access to electrical equipment such as blenders etc.

Reporting of food poisoning

- Food poisoning can occur for a number of reasons; not all cases of sickness or diarrhoea are as a result of food poisoning and not all cases of sickness or diarrhoea are reportable.
- Where children and/or adults have been diagnosed by a GP or hospital doctor to be suffering from food poisoning and where it seems possible that the source of the outbreak is within the setting, the manager will contact the Environmental Health Department and the Health Protection Agency, to report the outbreak and will comply with any investigation.
- If the food poisoning is identified as a notifiable disease under the Public Health (Infectious Diseases) Regulations 1988 the setting will report the matter to Ofsted.

Legal Framework

Regulation (EC) 852/2004 of the European Parliament and of the Council on the hygiene of foodstuffs

Completed: 04/09/17

To be reviewed: 04/09/18
